PROFESSIONAL SUMMARY

Full Stack Developer with 5+ years of experience building scalable web applications using C#, .NET Core, ASP.NET MVC, and modern JavaScript frameworks (React.js, Angular). Strong expertise in REST APIs, microservices, and Azure cloud solutions. Focused on performance optimization, clean architecture, and delivering high-quality production systems.

EXPERIENCE

Feb 2025 – Present

Full Stack Developer Islamabad Diagnostic Centre · Islamabad

- Designed and developed the MYIDC Patient Portal, enabling patients to securely access medical reports, book appointments, manage profiles, improving overall user experience and operational efficiency
- Built and maintained scalable RESTful APIs using .NET Core, supporting high-volume data transactions between frontend, internal systems, and third-party services
- Implemented secure authentication and authorization (JWT-based) to protect sensitive patient data and ensure compliance with data security standards
- Optimized backend performance by refactoring queries and improving Entity Framework usage, reducing API response times and enhancing system reliability
- Developed dynamic and responsive frontend components using modern JavaScript frameworks, ensuring seamless integration with backend APIs
- Integrated third-party services (e.g., lab systems, reporting services) to enable real-time data synchronization and automated workflows

Mar 2023 – Jan 2025

Full Stack Developer Embrace IT · Denmark

- Designed and developed the Hello Retail Commerce App, a full-stack e-commerce platform supporting product management, shopping cart, and checkout workflows
- Built scalable backend services using .NET Core and RESTful APIs, enabling seamless communication between frontend and server-side systems
- Developed modular and reusable UI components using React.js and Angular, improving maintainability and accelerating feature development
- Integrated frontend applications with backend APIs, ensuring efficient data flow and state management across the application
- Optimized application performance by reducing unnecessary API calls, improving rendering efficiency, and enhancing load times
- Implemented secure authentication and authorization mechanisms (JWT-based) for user sessions and protected routes

Nov 2023 – Apr 2024

Full Stack Developer (Remote)

Ultimus · New York City

- Designed and developed scalable microservices architecture using .NET Core, enabling modular, maintainable, and independently deployable services
- Built and exposed enterprise-grade RESTful APIs, supporting integration with internal platforms and external client systems
- Developed responsive and high-performance user interfaces using React.js, ensuring seamless user experience across devices
- Integrated multiple third-party APIs and services, enabling real-time data exchange and extending application functionality
- Implemented secure communication and authentication mechanisms, ensuring data protection across distributed systems
- Optimized application performance by improving API response times and reducing system bottlenecks

Mar 2021 – Jan 2023

Back End Developer

App In Snap · Islamabad

- Developed and maintained robust backend systems and RESTful APIs using ASP.NET MVC and .NET Core
- Designed and implemented data access layers using Entity Framework (ORM), ensuring efficient and secure database interactions
- Built scalable modules supporting business logic, authentication, and data processing workflows
- Improved application performance by optimizing database queries and reducing redundant operations
- Wrote and maintained unit tests, increasing code reliability and reducing production issues
- Debugged and resolved complex issues, enhancing system stability and maintainability

EDUCATION

2017 – 2021

Bachelor of Computer Science

Szabist · Islamabad

PROJECTS

🕒 **MyIDC**

A healthcare web application designed to manage patient records, appointments, and medical reporting in a centralized system for clinics or hospitals.

🕒 **Hello Retail Commerce App – E-Commerce Platform**

A full-featured online shopping platform enabling users to browse products, manage carts, and complete secure checkout flows.

CERTIFICATIONS
